## HEAVY-DUTY BEAM

## HEAVY-DUTY ANGLE POST

## ORIGINAL WEDGE-LOCK SHELVING UNITS

The Original Wedge-Lock design consists of primary framing members that snap together for easy assembly without bolts, rivets, or other fasteners. A mallet strike near the connection secures the frame, and deck material completes the unit. Shelves are accessible from all four sides, because cross-bracing members are not required. Posts and beams are roll-formed from 14-gauge steel and are finished with a heavy coat of baked enamel. These archive units (69" x 30" x 120") provide high-density storage of 12" x 15" x 10" document boxes. One unit with five shelves can carry 100 boxes!

WE CURRENTLY HAVE  
**400 UNITS** IN STOCK
